PROJECTS

- **StreamNest - Full-Stack Video Streaming Platform** ([view](#))
 - Designed and developed a scalable video streaming platform using React, Express.js, and MongoDB. Implemented core features including user authentication, video streaming, likes, comments, subscriptions, and playlist management. Built RESTful APIs with JWT authentication, handled CORS and deployment configurations, and successfully deployed the frontend on Vercel and backend on Render.
- **Anonymous Message** ([view](#))
 - Designed and developed a privacy-focused anonymous messaging platform that enables users to receive messages through unique shareable links. Implemented secure backend APIs for anonymous message submission and retrieval, ensured complete sender anonymity, and built a responsive, user-friendly interface. Integrated an AI-based message suggestion feature to help users generate meaningful and engaging anonymous messages.
- **Portfolio website**([view](#))
 - Developed a dynamic portfolio using Next.js and Tailwind CSS to showcase advanced frontend skills. Implemented responsive design and optimized performance for a seamless user experience.

TECHNICAL SKILLS

- **Programming & Scripting Languages:** Java, HTML, CSS, Javascript
- **Tools & Libraries:** ReactJS, NodeJS, Express JS , Next Js ,MongoDB, Tailwind CSS

ACHIVEMENT

- Developed and deployed full-stack web applications with secure authentication and scalable backend architecture.
- Built and deployed production-ready applications on Vercel and Render, handling real-world issues like CORS, authentication, and environment configuration.
